

Development and improvement  
of the energy and transport and  
transit infrastructure

# ENERGY SECTOR

**Minister of Energy and Water Resources  
of the Republic of Tajikistan  
Usmonzoda U.**

# National development strategy (2006-2015) goals in energy sector

1

**Development of new capacities (HPP`s Sangtuda -1, Sangtuda -2, TPP Dushanbe -2)**

**Construction of new and rehabilitation of existing infrastructure**

**Reduction of electricity losses**

**Real export of electricity**

**Rising of tariffs**

**Rehabilitation of “Barqi Tojik” infrastructure (production, transmission, distribution)**

**Attraction of private sector in the sphere (Pamir Energy, HPP`s Sangtuda 1 and 2)**

# Obstacles in the process of implementation

2

i

- **Disconnection of Tajik electricity system from Central Asian electricity grid**

ii

- **Discontinuation of electricity, and natural gas imports**

iii

- **The need for immediate establishment of internal electricity infrastructure (power transmission lines, substations and etc.)**

iiii

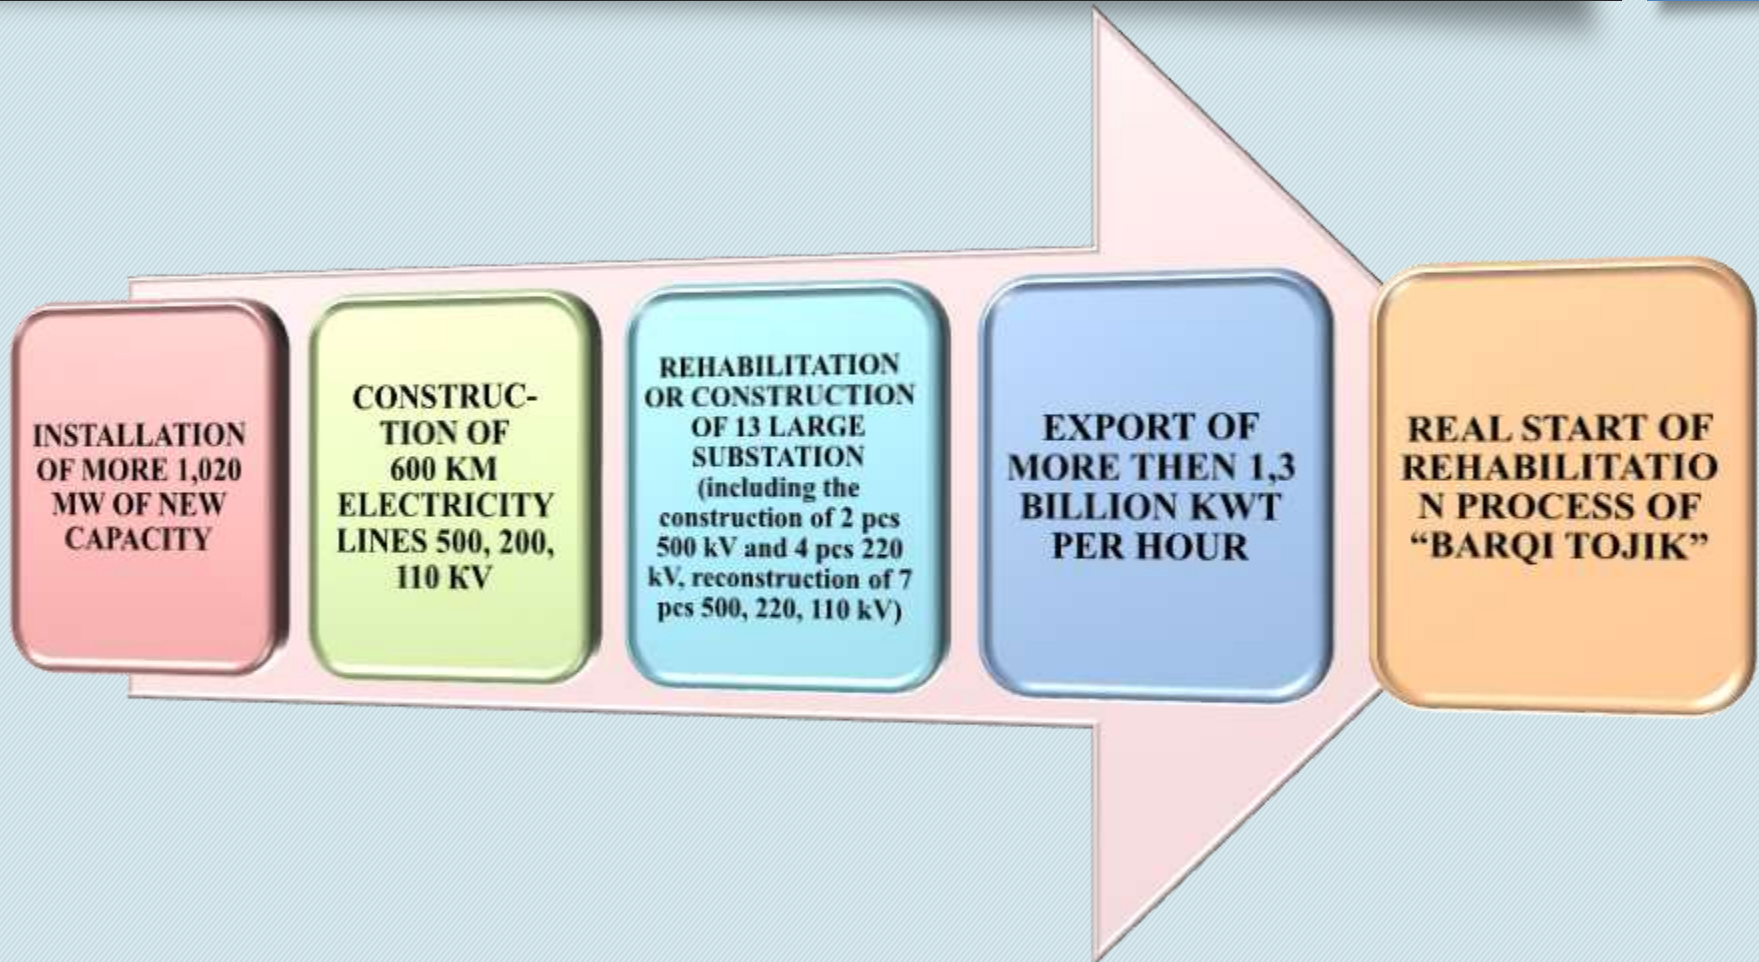

- **Global economic crisis**

iiiii

- **Problems with financial viability in the energy sector (OJSC Barki Tojik)**

# Progress achieved

3

# Midterm objectives – until 2020

4

**Completion of sector  
rehabilitation**

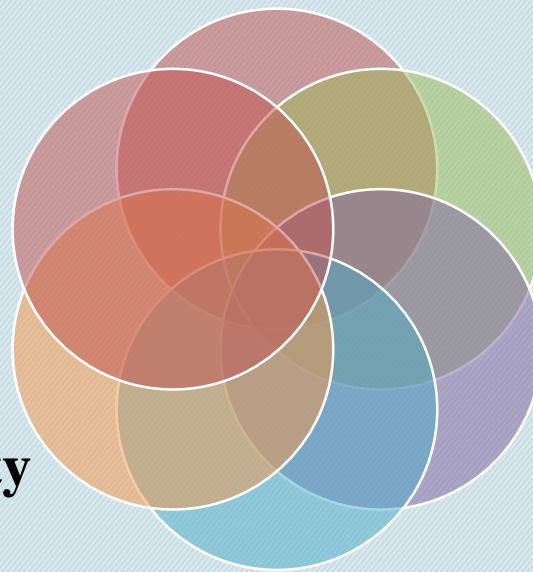

**Construction of  
production capacities  
of electricity and heat  
for winter season**

**Ensure  
accounting and  
collection**

**Development of  
regional electricity  
market**

**Reduction of losses  
and production  
costs**

**Ensure financial  
transparency**

# Long-term objectives - to 2030
